### **Ms. Maryam Nawaz Sharif**

Chief Minister Punjab

I am pleased to extend my warmest congratulations on the successful organization of the Pak Water & Energy Expo. This timely initiative highlights the critical importance of sustainable water management, clean energy, and environmental stewardship for the progress and prosperity of our province and country.

The Government of Punjab is fully committed to promoting innovative solutions and public-private collaboration in the water and energy sectors. Platforms like this Expo play a vital role in connecting stakeholders, showcasing advancements, and fostering dialogue for a resilient and self-sufficient future.

I commend the efforts of the organizers, participating companies, and professionals for their dedication to this essential cause. I am confident that the Expo will contribute significantly to the development of efficient, affordable, and sustainable technologies for water conservation and energy generation in Pakistan.

Let us continue working together for a cleaner, greener, and more prosperous Punjab.

My prayers and cooperation are with you and I am positive that this exhibition, by the Grace of Allah, would be a huge success and a forerunner of many more such shows only on a much larger scale.

### **Mr. Bilal Yasin**

Minister for Housing,  
Urban Development &  
Public Health Engineering Punjab

It is a pleasure to extend my heartfelt congratulations to the organizers, participants, and stakeholders of the Pak Water & Energy Expo. This event serves as an important platform for showcasing cutting-edge technologies, innovative solutions, and collaborative initiatives that are vital for the sustainable development of Pakistan's water and energy sectors.

The Government of Punjab, through the Housing, Urban Development & Public Health Engineering Department, is deeply committed to addressing the pressing challenges of water conservation, urban infrastructure development, and energy efficiency. Events like this Expo not only highlight advancements in these critical areas but also foster much-needed dialogue between public and private sector entities.

I commend the exhibitors for their active participation and their role in promoting responsible and forward-looking practices. I am confident that the exchange of ideas and technologies at this forum will pave the way for impactful partnerships and meaningful progress in the years to come.

I wish the Pak Water & Energy Expo every success and look forward to seeing the positive outcomes it will generate for our province and the nation as a whole.

## MESSAGE

---

### **Mr. Ghufuran Ahmed**

Managing Director  
Punjab WASA Lahore

I congratulate the organizers of Pak Water & Energy Expo 2025 Expo Centre Lahore for their tremendous efforts that apparently have gone into putting up a maiden Water exhibition at such a vast scale. Where representatives and professionals of the Water industry drawn not only from Pakistan but also from around the world would assemble under one roof and interact with each other for the advancement of the water industry in Pakistan.

Water is the lifeline. Be it an industrial setup or agriculture field or domestic activity. Availability, distribution, conservation, and treatment of water are hot topics on every engineering and social platform. The engineering community bears the burden of providing the solution to these problems.

The water processing Industry in spite of being one of the fastest growing industries in Pakistan has never got its due status and share in the economic policies. Our problems and grievances have not been taken seriously as there was no common platform from where we could discuss & and represent Water issues. For a long, a need of a good bond organization was being felt. The launching of the Pak Water Expo has given a forum from where Firms can raise and resolve different issues with Govt. bodies, other organizations, and the citizens of Pakistan.

I would like to compliment the exhibitors whose willing participation has made this event possible.

My prayers and cooperation are with you and I am positive that this exhibition, by the Grace of Allah, would be a huge success and a forerunner of many more such shows only on a much larger scale.

## MESSAGE

---

### **Syed Zahid Aziz**

Chairman,  
Pakistan Water Operators Networks (PWON)  
Managing Director PMDFC  
Punjab Municipal Development Fund Company

As the Chairman of Pakistan Water Operators Network, it's an honor for me to congratulate the Organizer of the Pak Water & Energy Exhibition at Expo Centre Lahore.

Punjab Saaf Pani (Clean Water) Authority is committed to improving public access to safe drinking water and ensure the sustainable operation and maintenance of water supply services, for each household in Punjab Province. Our mission is to help the government eradicate water-borne diseases and improve the health of all the people of Punjab.

Punjab Saaf Pani (Clean Water) Authority responsible for the provision of clean drinking water to the people of Punjab, in consultation with the relevant entities including the local governments. The main objective of the Punjab Saaf Pani (Clean Water) Authority is to provide clean drinking water to more than 70 million population in 36 districts of Punjab province mainly in rural, semi-urban, and peri-urban areas.

I encourage the organizers to continue holding such events on a regular basis. This will definitely help all participants from different disciplines to share their knowledge and experience with each other.

I would like to extend my warm wishes and a very pleasant stay to all the participants, including all the exhibitors, Speakers and organizers.

### **Kamran Abbasi**

Director

Pak Water & Energy Expo

**Pak Water & Energy Expo 2025** Lahore is the largest and most extensive global water trade event showcasing in Pakistan. It's a comprehensive range of products and services and the latest state-of-the-art technologies of the entire water value chain. It is a platform where top government officials, industry leaders, water experts, practitioners, and enterprises converge to establish business and networking opportunities.

Being one of the most exhaustive and crucial tradeshow, you will undoubtedly be able to source for your water solutions at this trade event. The highlights for this year's Water Expo are Advanced Wastewater Treatment Technology Reuse Solutions and Smart Water Solutions.

With a growing convergence of urban, water, and environmental issues around the world, there is a need to adopt an integrated approach to water resource management, urban planning, and environmental management. This will allow buyers and sellers to leverage shared synergies in cost efficiency, productivity, and R&D.

The purpose of organizing Pak Water & Energy Expo is not only to gather all the related business professionals and industries including sellers and potential buyers to show them about the current development and new trends in the Water industry. But also to provide a forum for exchanging new ideas and discussions with the aim of proposing solutions to various water-related problems in Pakistan.

I am thankful for to kind support of WASA and Saaf Pani Authority officials. Without their encouragement and help, the organization of this event would have not been possible.

### **Engineering Works and After Sale & Services**

Industrial Reverse Osmosis (RO) Plants & Drinking Mineral Water (RO) Plants, Ultra Filtration Plants, Water Softening Plants, Mix Bed Polisher Plants & Water Treatment Controllers, PLC & All Kind of Electrical Control Panels, Waste Water Treatment Plants, Poly Electrolytes & Maintenance Chemicals, Beverages, Power, Sugar, Textile, Glass, Paper, Leather, Paints, Refrigerator, Ice Industries Etc.

### **Name of Products:**

- Reverse Osmosis (RO) Plants & Drinking Mineral Water (RO) Plants.
- Ultra Filtration, Softening Mix Bed Polisher & Waste Water Treatment Plants.
- Water Treatment Chemicals for RO, Cooling Tower, Boiler & HVAC.
- Chemical Dosing Pumps, pH & TDS Controllers & PLC Electrical Control Panels.

## Reverse Osmosis (RO) Plants

Reverse Osmosis (RO) is a membrane based process technology to purify water for drinking purpose as well as by separating the dissolved solids from feed stream resulting in permeate and reject stream for a wide range of applications in domestic as well as industrial applications. It is seen from literature review that RO technology is used to remove dissolved solids, colour, organic contaminants, and nitrate from feed stream. Hence RO technology used in the treatment of water and hazardous waste, separation processes in the food, beverage and paper industry, as well as recovery of

organic and inorganic materials from chemical processes as an alternative method. This paper intends to provide an overall vision of RO technology as an alternative method for treating wastewater in different Industrial applications. The present short review shows applicability of RO system for treating effluents from beverage industry, distillery spent wash, ground water treatment, recovery of phenol compounds, and reclamation of wastewater and sea water reverse osmosis (SWRO) treatment indicating efficiency and applicability of RO technology.

### Advantages of RO Process

1. RO systems are simple to design and operate, have low maintenance requirements, and are modular in nature, making expansion of the systems easy;
2. Both inorganic and organic pollutants can be removed simultaneously by RO membrane processes;
3. RO systems allow recovery/recycle of waste process streams with no effect on the material being recovered;
4. RO systems require less energy as compared to other technology; and
5. RO processes can considerably reduce the volume of waste streams so that these can be treated more efficiently and cost effectively by other processes such as incineration
6. The RO plant is normally operated at ambient temperature which reduces the scale formation and corrosion problems, because of antiscalant and biocidal use, which will reduce maintenance cost.
7. The modular structure of the RO process increases flexibility in building desalination plants within a wide range of capacities.

Manager Business Development

**3W Systems (Pvt.) Ltd.** Pakistan is a limited liability company incorporated in 2005 with Security Exchange Commission of Pakistan (SECP) under companies' ordinance 1984.

The company was formed by Team of Professional Engineers (TOPE) who has diverse expertise in the field of Civil, Electrical, Mechanical and Process Engineering. The company is ISO 9001, 14001 & 18001 certified. 3W Systems is primarily an engineering organization with diverse business portfolio.

The company specializes in 3W (Water & Waste Water) engineering providing total system solutions in the field of core expertise. The company does complete pipeline engineering, process design & implementation of water and wastewater treatment plants, pumping system design and engineering etc. The company also has a fire system division which provides Fire detection & fire suppression systems and related services to its valued clients.

### Name of Products:

- Water Treatment Plants
- Water Distribution Systems
- Fire Detection Systems
- Fire Suppression Systems
- Wastewater Treatment Plant
- Sewerage Networks
- Firefighting Systems
- Pumping Systems

**ASOE** is not only a manufacturer of hose and pipes, but also a provider of different kinds of hose & pipe solution. In 2013, ASOE bring its' liner into trenchless pipe rehabilitation technology. Now we are one of the most professional trenchless solution providers in China. We have varieties of solutions for pressure pipes and gravity pipes.

For pressure pipeline, such as water main or gas pipe, we provide Pipe-in Liner™ Flexible Fabric Reinforced Pipe solution. This kind of solution could repair pipe diameter from DN50 to DN1600, pressure rating up to 4.2Mpa.

For gravity pipeline, such as storm pipe or sewage pipe, we provide FFPP™ Folded and Formed Plastic Pipe solution. It's a factory-made modified PVC Liner, very easy to install.

## AQUA FAIR

Plot# A-46, Sector – 27,  
Korangi Industrial Area, Karachi - 74900

**Telephone** : 021-35122315, 0335-2865747,

**E Mail** : info@aquafairpk.com, sales@aquafairpk.com  
**Web** : www.aquafairpk.com

<b>Contact Person</b>	<b>Designation</b>
Mr. Dawood Akbar	Sales Manager

### Name of Products:

#### True Depth Filtration

**Aqua Fair** depth filters have revolutionized filtration with Higher-level technology that overcomes the limitations and drawbacks of other filters.

#### Higher-Level Filtration Technology

**Aqua Fair** technology produces Higher-Level Filtration Technology depth filters with increased filtration capacity, longer lifetime, and higher performance that reduce overall costs. Aqua Fair filters have high structural integrity combined with a greater void volume, giving a lower pressure drop, much improved dirt holding capacity and efficiency compared to conventional filters. Aqua fair filters are made of polypropylene, a recognized environmentally safe and recyclable material for purity and ease of disposal.

**Aqua Fair** the standard extractable-free pure polypropylene filter cartridges is designed for optimal filtration performance. It has received ISO 9001-2015 certification.

#### Liquid filter bags

**Aqua Fair** liquid filter bags are in a perfect world suited for pre-filtration, final filtration and treatment.

**Aqua Fair** fluid filter bags are made in polypropylene, polyester or polyester cotton.

**Aqua Fair** ISO certified Our Product is based on Depth Filtration philosophy, we are able to manufacture products as per Client requirement as well.

1. PPY Filters Cartridge
2. Liquid Bag Filters

## Higher-Level Filtration Technology

### Extractable-Free Media

Pure polypropylene AquaFair filter cartridges are free from any extractables and contain no lubricants, wetting agents, emulsifiers, anti-oxidants or anti-static agents, etc. They are suitable for use in applications like RO pretreatment (SDI reduction), drinking water and beverage processing, sea water desalination, gas purification, electronics and electroplating, photographic solutions, oil and gas production (deep well injection of produced water and wastewater disposal), cooling tower water filtration, etc.

The standard pure polypropylene cartridge is extractable-free and engineered for higher-level filtration performance. It has been certified by ISO 9001-2015.

Available in up to 72 inch (1270 mm) length and 4.5 inch (115 mm) diameter.

### End Adapters

### Liquid Bags Filter with steel rings

### Liquid Bags Filter with Plastic Flanges

**BBJ Pipe Industries Limited** was incorporated in 1991 under section 32 of Companies Ordinance 1984 with its factory at 48.5 KM Main Multan Road and came into production of Steel Pipes in year 1991. The factory is equipped with Japanese & German design mills to manufacture high quality ERW steel pipes. BBJ has the capacity to produce pipes conforming to international standard such as BSS, API 5L & ASTM. BBJ Pipe is authorize to manufacture pipes under API 5L license and is also ISO 9001 – 2015 certified company. BBJ is approved manufacturer / supplier in government & private sector. BBJ Pipe has the capacity to produce 150,000 metric tons of steel pipes per annum. BBJ Pipe Industries also manufactures Polyethylene Pipes ranging from 16mm - 500mm diameter used in Gas, Water Supply, Sewerage, Cable Duct, Industrial and Municipal applications. The company has also installed in House Laboratory to ensure quality of products. Polyethylene pipe is extruded from selecting internationally reputed supplier high quality resin, extruded with precision and strict quality control measures taken to ensure high quality of the product in compliance to international standards. In the year 2018, BBJ Pipe has set up a subsidiary company, BBJ Steel Limited, to manufacture Cold Rolled Coils, with thickness range from 0.5mm to 3.0mm with width upto 750mm.

**Name of Products:**

- API SPEC 5L Steel Pipe
- Scaffolding Pipes
- Hollow Structural Section
- HDPE Water Pipes
- Cable Duct Pipes
- MS Pipe
- Fire Fighting Sprinkler Pipes
- Galvanized Iron Pipes
- MDPE Gas Pipes
- Cold Rolled Coils (CRC)

**Shafisons Engineering (Private) Limited** (SSEPL) created ripples in the field of Engineering Plastics in the year 1994 by launching of brand, "BETA PIPES". Our business activities are focused on the development, manufacturing, and distribution of plastic pipe systems and solutions. At **Shafisons Engineering (Private) Limited**, we aim to be the most valuable solution provider of plastic pipe systems, unrivaled in terms of quality, reliability, affordability, availability, technical innovation, and customer satisfaction.

**Shafisons Engineering (Private) Ltd.** has its head office and manufacturing plant located in Lahore with a regional office in Islamabad, backed by a strong national retail and distribution network. Our involvement in the conceptual phase of projects with engineering consultancy organizations further facilitates clients in identifying solutions that achieve the best long-term results.

Our entire management is committed to the motto of "Service and Quality," where a customer-driven approach is demonstrated by providing excellent products and services that are the result of constant improvement and innovation at the highest quality level. We feel proud to revolutionize the pipe industry in Pakistan by introducing plastic materials to replace traditional metallic and concrete systems. At SSEPL, we manufacture multiple pipe systems for various applications, mainly utilizing three different materials: Polyvinyl Chloride (PVC), Polypropylene Random Copolymer (PPRC), and High-Density Polyethylene (PE-100). Our product range covers PVC-U and PE-100 Pressure pipes for cold potable water supply applications, RIGID PVC (PVC-) Electrical conduit systems, PVC-U Soil, Waste & Vent (SWV) pipes and fittings, PPRC pipes and fittings for above-ground hot and cold-water supply applications. Our 'Customer Care' department offers a variety of services, including technical support, design proposals and estimates, customized tools, and techniques which are to be followed up by regular feedback to enhance customer satisfaction and user experience. The certification issued by SGS for Quality Management System and Environmental Management System conforming to ISO 9001:2015 and ISO 14001:2015, respectively, further demonstrates that our products, processes, systems, and services are compliant with national and international regulations and standards.

At **Shafisons Engineering Pvt. Ltd.**, the market is segmented into Infrastructure, Sanitary, Agriculture, Electrical & Communication solutions, comprising both above and below-ground pipe systems. Our partners are building and civil wholesalers, plumbing retailers, civil contractors, housing developers, large installers, utility companies, and municipalities. Our most important asset is our professional workforce, which has played a pivotal role in turning dreams into realities by sheer hard work, teamwork, and constant focus on delivering services internally and externally to harness core competencies, brand loyalty, and customer satisfaction.

**Bishuikang Health Technology (Shandong) Co., Ltd.**, located in Heze City, Shandong Province, is a high-tech enterprise specializing in the research and development, production, and sales of water treatment products. We hold numerous independent intellectual property rights and our own brands. Our factory covers over 50,000 square meters and houses a comprehensive laboratory. We also operate over 70 advanced automated production lines, enabling one-stop production from components to finished products. Our products are sold well domestically and exported to North America, Europe, Southeast Asia, and other regions and countries.

Dedicated to creating value for our customers, we are committed to becoming an industry leader with distinctive technological advantages. We actively introduce the most advanced filtration and testing technologies from home and abroad. By continuously addressing technical challenges and accumulating experience, we have developed highly effective water purification solutions for both domestic and commercial use.

BNB Consolidate is also a trusted distribution partner for renowned global brands including Grundfos, Aqua Solutions, Mudex, Crusader Hoss, Geo Sondaj and Peerless Pumps.

### **OUR PRINCIPALS:**

BNB Consolidate proudly serves as an authorized distributor for industry-leading brands and products from our esteemed principals.

**GRUNDFOS** a global leader in water technology, manufactures over 16 million pump units annually and operates in more than 55 countries. Its product range includes highly efficient and sustainable pumps for domestic, municipal, and industrial purposes. These solutions feature advanced electronics for optimal performance, including solar-powered systems for off-grid locations and specialized pumps for heating, cooling, and pressure boosting. As a distributor, BNB Consolidate offers tailored solutions utilizing Grundfos innovative technology to ensure reliability and efficiency in water management across Pakistan and international market.

Mudex, is an Australian manufacturer of high-quality drilling fluids, serving sectors such as mining, exploration, civil, and water well drilling. Established in 2014, Mudex emphasizes using premium ingredients and sustainable practices. Its capabilities include in-house research and development, manufacturing of water-based and oil-based products, and providing training programs like "mud schools" for field personnel.

Aqua Solutions stands at the forefront of providing comprehensive solutions across a spectrum of water and geological engineering challenges. From meticulous reconnaissance surveys and precision hydro drilling to the seamless provision and installation of cutting-edge Reverse Osmosis plants, we offer a complete suite of services.

Peerless Pump is a leading U.S.-based manufacturer of high-performance pumps and pumping systems, renowned for their reliability and efficiency in demanding applications. With a legacy of over 100 years, Peerless specializes in vertical turbine, end suction, and split-case pumps for fire protection, industrial, municipal, and agricultural markets. Their engineering excellence and strong designs ensure long-term, cost-effective performance.

Crusader Hose specializes in high-quality layflat hose solutions for a wide range of applications, including bore water retrieval, dewatering, and industrial fluid transfer. With over 35 years of innovation, Crusader Hose delivers durable, efficient, and cost-effective hose systems tailored to meet the needs of the mining, agriculture, and water industries. Their engineered solutions are trusted across domestic and international markets.

GeoSondaj is a trusted provider of geotechnical and environmental drilling solutions. They specialize in soil investigation, groundwater monitoring, and foundation testing. With modern equipment and skilled personnel, they ensure precise, reliable data collection.

### **Name of Products:**

- Single Stage End Suction Centrifugal Pumps (NK, NB series)
- Horizontal Multistage Pumps (CM, CME series)
- Vertical Multistage Pumps (CR, CRE series)
- Submersible Groundwater Pumps (SP, SPE series)
- Submersible Waste Water Pumps (UNLIFT, SL, DPK series)
- Dosing Pumps (DDA/DDC, DMH/DMX pumps)
- Water Booster Pump (HYDRO MPC series)
- Borehole Drilling Fluid Chemicals
- RO Plants, UF Plants
- Fiber Glass Casing
- Flexible Piping Solution for Bore well
- Turbine Pumps
- Centrifugal Pumps
- Submersible Pumps

### **Name of Principals**

- GRUNFOS (DENMARK)
- MUDEX (AUSTRALIA)
- GeoSondaj
- AQUA SOLUTION FZE (UAE)
- PEERLESS PUMPS (UNITED STATES)
- CRUSADER HOSS (AUSTRALIA)

**Bore and Bore** is a reputable firm offering comprehensive services in hydrogeology, geotechnical engineering, and water treatment. With a proven track record across Pakistan, we provide practical and effective solutions to manage water resources, address complex engineering challenges, and deliver clean, safe water.

## **DESCRIPTION OF BUSINESS ACTIVITIES:**

At BNB, we cover several key areas:

### **Hydrogeological Services:**

We undertake well drilling for industrial and select applications, conduct aquifer evaluations and extended pump tests, and provide complete well rehabilitation. Our services also include the installation of advanced water treatment systems such as Reverse Osmosis (RO) plants.

### **Geotechnical Engineering:**

Our geotechnical division performs soil investigations, core drilling, and pile load testing, important to the design and execution of infrastructure projects including dams, bridges, and building foundations.

### **Geophysical Services:**

We conduct subsurface evaluations using methods like electrical resistivity and borehole logging. These services are key to groundwater mapping, mineral prospecting, and environmental diagnostics.

### **Topography and Civil Engineering:**

BNB offers topographical surveys, land mapping, and land demarcation. We also handle the planning and layout of roads, sewerage systems, and civil infrastructure to support precise and efficient development.

### **Water Treatment:**

Our expertise includes the deployment and upkeep of water purification systems, including Effluent Treatment Plants and various filtration units, enabling both industries and communities to access safe & treated water.

Across all divisions, we are committed to providing tailored, high-quality solutions focused on reliability, sustainability, and long-term value.

### **HDPE Butt Fusion Fittings**

Euro One Butt Fusion Fittings are designed for compatibility with all HDPE (PE-100) materials. These fittings serve a variety of applications:

- Process Water
- Potable Water
- Inorganic & Organic Chemicals
- Waste Water
- Pit Dewatering
- Fresh Water
- Hydrant Lines
- Cooling Water

And Many More

Available in Pressure Ratings: PN-10, PN-12.5, PN-16

Size Range: 50mm to 800mm

### **PP Compression Fittings**

Our Compression Fittings are compatible with HDPE and PPRC pipes, providing easy installation and versatile solutions for:

- Potable Water
- Elementary Fluid
- Irrigation Solutions
- House Connections

Available in Pressure Ratings: PN-10, PN-16

Size Range: 20mm to 110mm

House Connection Saddle Clamps: Up to 315mm

### **Additional Products**

Euro One also offers:

- Electrofusion Fittings
- HDPE Butt Fusion and Electrofusion Jointing Machines

Ms.Wang	Sales Manager

**Shenzhen Taoshi Co., LTD**, founded in 2006, is a leading modern enterprise dedicated to integrating research and development, innovation, production, and distribution. As a professional supplier of high-quality water purifier accessories, we have always embraced the principle of "coexistence of innovation and development, professionalism and excellence." Our original mission, "To be the brand behind the brand," drives us to continuously learn from the best practices of international leaders in the industry, striving to break through traditional technologies.

Over the past decade, Shenzhen Taoshi has grown significantly, now occupying over 30,000 square meters of advanced manufacturing facilities. Through this growth, we have made substantial advancements in the research and development of water purification components such as water pipes, pressure tanks, filter housings, filter cartridges, and membrane housings.

As our production capacity expands, we place an even greater emphasis on quality control, ensuring that each product meets the highest standards of reliability and performance. Our products have passed rigorous quality inspections and hold various certifications such as NSF, ROHS, CE, and others, confirming their safety and compliance with international water-related standards. Additionally, we have developed specialized quality testing programs for each category of water purifier components, ensuring consistent excellence.

Innovation and dedication are the core values that define Shenzhen Taoshi, with integrity being the guiding philosophy in all aspects of our business. We are deeply committed to fostering a healthier water environment for consumers worldwide by providing them with high-quality, safe water purification products and efficient, customer-focused services. Looking ahead, Shenzhen Taoshi will continue to innovate, collaborate with industry peers, and work tirelessly to preserve global water resources and promote environmental sustainability.

**Syntech Fibres** is an ISO 9001-2015 certified manufacturer of patented extractable free **Aqua Clear filter cartridges** that are certified to NSF/ANSI/CAN standard 61.

**Aqua Clear** technology produces superior depth filters with increased filtration capacity, longer lifetime, and higher performance that reduce overall costs.

**Aqua Clear** cartridges have high structural integrity combined with a greater void volume, giving a lower pressure drop, much improved dirt holding capacity and efficiency compared to conventional filters.

**Aqua Clear** cartridges are made of polypropylene, a recognized environmentally safe and recyclable material for purity and ease of disposal. They are suitable for use in applications like RO pre filtration (SDI reduction), Drinking water and beverage processing, produced water, well water injection and disposal water filtration, Gas purification, Electronics and Electroplating, photographic solutions etc.

**Aqua Clear** filter housings combine superior technology, cost effectiveness and efficiency to meet the demands of commercial and industrial applications.

Aqua Clear filter bags and panels are ideally suited for pre-filtration, final filtration and process treatment.

Ultramarine Tech is a leading engineering company specializing in advanced water treatment solutions. With a focus on innovation and quality, we deliver complete, end-to-end services tailored to meet the unique needs of our clients. Our expertise lies in creating reliable systems that ensure the highest level of performance and customer satisfaction.

### Our Core Business Activities

At **Ultramarine Tech**, we offer a comprehensive range of services, including:

- **Water and Wastewater Treatment:**

Treatment of groundwater, process water, and wastewater for reuse, ensuring full compliance with environmental standards.

- **Ultrapure Water Solutions:**

High-precision systems for pharmaceuticals, food and beverage, power, and microelectronics industries, delivering ultra-high purity water.

- **Turnkey Project Management:**

Complete project execution from design and assembly to installation, commissioning, and ongoing support.

- **Engineering and Design Services:**

Custom-engineered solutions using advanced design tools for optimal system performance and efficiency.

- **After-Sales Support:**

Full lifecycle services, including maintenance, operational support, and training to ensure long-term system reliability.

We take pride in our ability to blend advanced technology with local and imported components. Ultramarine Tech is your trusted partner for achieving clean water solutions with unmatched service and quality standards.
